ETE-TH07

The World's First Remote Body Temperature Measuring Bracelet. The Health Monitoring Edge device ETE-TH07 is designed for a large variety of applications to enable health monitoring and activity tracking remotely and instantly. We integrate Real Time data through the ETE-TH07G A-IOT Smart Bluetooth Gateway and/or our ETE Health Mobile Applications compatible with Android and IOS. We also offer desktop based software to view collected data of a large number of individuals along with customizable alarm functionality considering Cloud and Premise Based Evaluation.

- Browser based Software and Mobile Apps
- Real-Time data with distribution analysis
- Alarm with pre-set threshold through backend configuration – Temperature, Wrist off, Location etc.
- Indoor Bracelet location service when multiple Gateways are deployed
- Features such as Heart Rate, Blood Pressure, Social Distance, Temperature Sharing are coming soon

ETE-SN-T5

Can measure the Temperature of 30 Humans within 30 ms combined with Facial Recognition – in a distance of up to 5 meters

Healthy - Temperature Measuring Accuracy | Applicable to any Temperature in the normal Range

ETE-TH06

36.35 °C to 36.65 °C — High Temperature Measuring Accuracy wityh up to +/- 0.3°C,

Can measure the Temperature of 1 Human within 300 ms combined with Facial Recognition, People Counting – in a distance of up to 80 cm

36.25 °C to 36.75 °C — Medium Temperature Measuring Accuracy, +/- 0.5°C

ETE-ITMH

36 °C to 37 °C — Low Temperature Measuring Accuracy, +/- 1°C

Can measure the Temperature of multiple Humans within 500 ms – in a distance of up to 1m

Illness Temperature Measuring Accuracy | Applicable to any Temperature in the Fever Fange

ETE-TH-02

37.85 °C to 38.15 °C — High Temperature Measuring Accuracy, +/- 0.1°C

Can measure the Temperature of 1 Human within 500 ms in a distance of up to 3 to 5 cm – Manual Approach

37.75 °C to 38.25 °C — Medium Temperature Measuring Accuracy, +/- 0.5°C

ETE-TH-07

37.5 °C to 38.5 °C — Low Temperature Measuring Accuracy, +/- 1°C

Can measure the Temperature of 1 Human within 500 ms - Wrist Approach

ETE-G200-37

COMING SOON

Can measure the Temperature of 1 Human within 300 ms combined with Facial Recognition – in a distance of up to 4 meters with optional creative features

YOUR GOAL IS OUR MISSION

Dear Partners,

Eye To Eye Security Trading DWC-LLC, established in January 2017 with a Security background of more than 38 years provides a tailor-made product portfolio to suite a wide range of Mobile Surveillance Applications.

Before we do anything, we start with our clients in mind and this enables us to develop solutions which create tangible benefits and deliver excellent Return on Investment.

We are intrinsically R&D and Service oriented in spirit and for this reason we invest a large part of our annual revenue to develop more innovative products and mobile solutions. We take to heart the adage that excellence is a journey and cordially invite you to join us through a progressive future.

Warmest welcome,

Your trusted Eye To Eye Security Team for Versatile Temperature Measuring and Health Check Solutions
